

PROP SPECS

15x9 3BLADE FIXED

PHOTO ATTACHED.

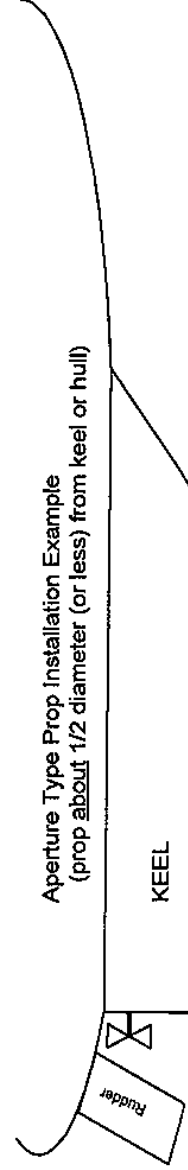

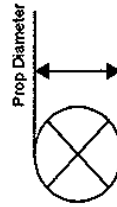

Fixed Propeller Measurements

To be eligible for rating credit, propellers must be of fixed design, with no folding or feathering mechanisms. The required information must be provided with the request for credit. In addition to renewal or application forms. Diagrams below are examples only, and are intended to show approximate installations. A photograph of the propeller and installation on the yacht is preferred to be included with the application for propeller credits. Individual installations may vary.

Required Information

1. Description/diagram, or photo (preferred) of prop installation
2. Type installation (Aperture or exposed)
3. Number of blades
4. Diameter of propeller (in inches)
5. Pitch of propeller (in inches)
6. Minimum distance (EXP) from prop to trailing edge of keel in decimal ft.
7. Length of exposed shaft (SHAFT) in decimal ft. (from hull exit to hub of prop)

Aperture Type Prop Installation Example
(prop about 1/2 diameter (or less) from keel or hull)
